PROFESSIONAL SUMMARY

Computer Science graduate (AI & Machine Learning specialization) with hands-on experience building full-stack web applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** and **REST APIs**. Additional experience applying **Python-based machine learning** models for time-series forecasting and predictive analytics during two data science internships. Seeking an entry-level **Full Stack Developer / Software Engineer** role.

EDUCATION

Amity University, Gwalior, Madhya Pradesh, India Aug 2022 – Jun 2026
Bachelor of Technology in Computer Science and Engineering; Specialization: Artificial Intelligence & Machine Learning; CGPA: 7.2

K.R. Education Centre, Uttar Pradesh, India Jun 2022
Intermediate; Percentage: 72.7%

PROFESSIONAL EXPERIENCE

Data Science Intern — Edorer (Remote) May – Jul 2024 & Jul – Aug 2025

Project: Air Quality Forecasting Through Machine Learning

- Built an **AQI** forecasting system using **Prophet**, applying preprocessing and feature engineering techniques to time-series air quality data.
- Implemented and compared **Regression**, **Random Forest**, and **LSTM** models to forecast **AQI** trends and pollutant levels.
- Developed visualizations to communicate **AQI** trends, forecasts, and pollutant-level analysis to stakeholders.

Project: IPL Match Prediction Through Machine Learning

- Developed a match outcome and win-probability prediction system using **Logistic Regression**, **Random Forest**, **XGBoost**, **ANN**, and **LSTM** models.
- Created data visualizations to surface player, team, and match-performance insights.

PROJECTS

Real-Time Wanderlust – Airbnb-Style Listing Platform (MERN)

[Live Demo](#) | [GitHub](#) — **MongoDB, Express.js, React.js, Node.js, Socket.io, REST API, JWT, TailwindCSS**

- Built a full-stack property listing platform with user authentication and secure session handling using **JWT**.
- Implemented listing management, image uploads via **Cloudinary**, advanced search filters, and a reviews/ratings system.
- Designed **MongoDB** schemas and integrated **REST APIs** for storing and retrieving listings and reviews, with a responsive **TailwindCSS** frontend.

AI Recruitment System – AI-Powered Recruitment Platform (MERN)

[Live Demo](#) | [GitHub](#) — **MongoDB, Express.js, React.js, Node.js, JWT, REST API**

- Built a full-stack **AI Recruitment System** using the **MERN** stack to streamline job posting, candidate applications, and recruitment workflows.
- Implemented separate recruiter and candidate functionalities with secure **JWT**-based authentication and authorization.
- Developed job management and application workflows, allowing recruiters to post and manage jobs while candidates can apply and track their applications.
- Integrated resume upload and **AI**-assisted candidate evaluation features to help recruiters analyze and assess candidates efficiently.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C/C++

Web Technologies: HTML, CSS, REST APIs, JWT Authentication, Socket.io, TailwindCSS

Frameworks & Libraries: React.js, Node.js, Express.js, Angular.js

Databases: MongoDB, MySQL, SQL

Data Science / ML Libraries: Pandas, NumPy, Scikit-learn, TensorFlow/Keras, Prophet, Matplotlib, Seaborn

Developer Tools: Git, VS Code, MySQL Workbench, Android Studio, Jupyter Notebook, Replit

Core Computer Science: Operating Systems, Computer Networks, DBMS, OOP, Design and Analysis of Algorithms

CERTIFICATIONS & ACTIVITIES

- Deloitte Australia – Technology Job Simulation | Forage — September 8, 2026
- IEEE Training Participant — EBSCO Information Services (Remote)
- Coordinator — Amity Youth Fest (Amichroma), Amity University Gwalior
